

HEALTH AND SAFETY

Health and Safety

IPC Exeter is committed to maintaining a safe environment for students, staff and visitors.

We take reasonable steps to ensure that all activities, learning environments and accommodation arrangements are conducted safely.

Our approach includes:

- risk assessment of activities and facilities
- clear safety procedures for staff and students
- appropriate supervision of younger students
- guidance on behaviour and safety expectations

Students are expected to follow staff instructions and to behave responsibly in order to ensure the safety of themselves and others.

Health and safety procedures are reviewed regularly as part of our commitment to maintaining safe programmes.

Full documentation is available upon request.
